Poppy Pearce [REDACTED] [com](#)

Hello, i have seen the notice for the license for The woodpecker bar and kitchen. Firstly i am blown away that someone that works for the community would be reporting such a great community orientated place that brings everyone together.

Considering they moved next to a very loud busy main road and two potential venues, one of them already being a pub, really does make me think if this report is even about the noise, some people just do not like other peoples success'.

I have never seen a couple work so hard and have such a great outcome with everything they put their minds too, they both work 19 hour days, 7 days a week without fail and always have smiles on their faces whist accomodating everyone, they are always going out their way to make sure every person comes, leaves feeling valued and always thinking of ideas in order to facilitate everyone as such as free fireworks for the community for those that can't afford paid events or home displays, free camper-van parking for customers and a fond memory was when the electric went in the village they offered everyone to come and use their gas facilities to make sure no one went hungry.

So much time and effort is put into this beautiful place for everyone to enjoy for example, beautiful nature trail, meadow for the occasional event and camping with facilities, a rope swing, wood huts and lots of wildlife. Having the woods also gave the idea of using the logs from the woodlands to sell to the public. All of this is also dog friendly which helps many people.

This is a small incite to what a great place this is.

Thank you for your time to read this email.
Take care
